

CBET 24M / EE-6
CBET 24S / EE-6
DCBET 24S / EE-6
CAT 2

Attempt all questions.

- 1) What is the function of a surge protector in ~~the~~ an installation involving electrical machines. (2mks)
- 2) What is the purpose of Grounding Electrical machines. (2mks)
- 3) An electrical short circuit results in very high current flow. True or false? (1mark)
- 4) Machine alignment means positioning motor and the load in a straight line. True or false? (1mk)
- 5) For maximum power delivery the machine and motor couplings should be aligned. True or false? (1mk)
- 6) The most satisfactory results of insulation resistance test in an electrical installation is "Not less than 1M Ω ". True or false? (1mk)
- 7) Define the following terms with respect to electrical installations.
(a) Inspection.
(b) Testing. (4marks)
- 8) What is the role of a thermal overload relay in ~~the~~ installation an electric motor installation. (1marks)
- 9) Differentiate between an electric motor and an electric generator with reference to energy transformation and application. (2marks)
- 10) Identify four factors considered when designing a machine layout.
- 11) List THREE advantages of ~~a~~ a transformer over electrical machines.
- 12) Highlight four factors that affect efficiency of a dc motor.

13) Explain the function of each of the following as used in construction of ~~machines~~ a dc machine.

a) Brush.

b) Commutator.

(4marks)

14) Identify THREE tools used in cable termination and their functions. (6marks)

15. Describe THREE types of tests performed after motor installation. (6marks)

16) Outline Four factors considered when ~~sizing~~ ^{selecting} an electric motor. ~~(4marks)~~ for a particular industrial drive. (4marks)
